

AI Use Declaration Form

Course: Introduction to Artificial Intelligence

Lab Title: Lab 1 Part A — Uninformed Search Algorithms

Student Name: _Boniphace Benjamin

Student ID: 75052028

GitHub Repository Link: <https://github.com/boniphacebenja78-lgtm/ai-course-lab0#ai-course-lab0>

Date Submitted: 6/ May/ 2026

1. AI Use Summary

Question	Student Response
Did you use any AI tool for this lab?	Yes
Estimated percentage of the work influenced by AI	19%
Did you attach evidence of AI use where applicable?	Yes

2. Details of AI Use

Complete the table below for each AI tool used. Add more rows where necessary.

Name of AI Tool Used	Purpose for Using the Tool	Prompt or Instruction Given to the Tool	Part(s) of the Work Influenced by the Tool	How I Verified, Edited, or Improved the AI Output
ChatGPT	Knowledge gains and supports me whenever I get stuck. So, I'll ask it what made me stuck so It'll make me understand and then I move with other question.	- explain to me these libraries and how they are used, give me good examples about intro AI context as this assignment provided. Where we are supposed to use them.	-Exercises -how to connect google colab, with GitHub. -when creating virtual environment	Yes, with the output it makes the work looks nice and it helped my work to run perfectly.

3. Attachment of AI Output Evidence

Where required, attach evidence of AI use. Tick all that apply. Add more rows where necessary.

Evidence Type	Attached? (Yes, No, N/A)	File Name
AI-generated draft	yes	Reference attached
Prompt history	yes	Reference attached
Screenshot of AI interaction	yes	Reference attached
Exported AI conversation	yes	Reference attached
AI-generated code snippet	yes	Reference attached
Revised version showing student input	yes	Reference attached

4. Student Declaration

I declare that:

Declaration Statement	Response (Yes/No)
The submitted work is my own work.	yes
Any use of AI tools has been clearly declared in this form.	yes
The prompts, instructions, and AI-generated outputs have been disclosed where applicable.	yes
I reviewed, tested, edited, and improved any AI-generated content before submission.	yes
My AI usage does not exceed 25% of the entire work.	yes
I understand that undeclared or excessive AI use may be treated as academic misconduct.	yes

REFERENCES:

how to link the google colab with github for my assignment submissions. perfectly

Using **Google Colab + GitHub** is a great way to submit assignments and keep backups of your work.

Step 1: Create a GitHub Account

exaplin me about some oy these paackages and if possible give exampls to intro Ai class examples, packages such as Numpy fundaments, pandas , matplotlib and seaborn be very specific i want to learn how exactly they work for my coming assimgment

Good—this is exactly what you should understand before your assignment. I'll explain each package in a **practical AI/Data Science way**, not theory-first.

You'll see:

- what it is
- why it exists
- how it works internally (conceptually)
- and real examples like **your assignments**

1. NumPy (Numerical Python) — THE ENGINE

so, i really want you to explain to me each line of the code because as CS student i really need to know why this code and these fuctions

That's exactly the right approach. As a CS student, don't just copy code—understand **what each line does**, **why it is used**, and **what alternatives exist**.

I'll explain the visualization code section by section.

1. Importing Libraries
